

S-STEM Scholars Program – Mentorship Goals

Mentorship is an important part of academic and professional growth. In the S-STEM Scholars Program, we encourage mentorship partners to establish mutually agreed upon goals and practices that will result in a positive mentorship experience for everyone.

As a first step toward establishing a meaningful mentorship, please consider your long-term and short-term academic and personal goals, and what you hope to gain from the mentorship part of the S-STEM Program.

1. **What are your long-term, academic/professional goals?** (e.g. major, degree attainment, job status, etc.):

2. What are your academic and professional goals for this academic year? (e.g. coursework, clubs, career exploration, internship/transfer applications, etc.):

This material is based upon work supported by the National Science Foundation Grant No. 2130457.

3. What are some mentorship components that can help you to achieve your goals?

A few potential components are listed here. Please check which of these you are interested in, and add anything that is important to you.

- ☐ Study and/or college-readiness skills
- ☐ Technical skills related to your career interests
- ☐ Academic and career pathway advice
- ☐ Support and encouragement in work/school/life balance
- ☐ Finding and applying for internships
- ☐ Resume building advice and support
- ☐ Scholarship and transfer application support
- ☐ _____
- ☐ _____
- ☐ _____

4. Do you want to complete a project with your mentor as part of the S-STEM Scholars Program?

- ☐ Yes
- ☐ No

Please include any comments about the project that might be helpful for a potential mentor to consider here:

5. What other considerations are important for a positive mentorship? (e.g. frequency of meetings, meeting times, communication style, etc.):
